PIPE CUTTERS H-SERIES 32 MM - 356 MM

- Can be used in convined spaces • no sparks
- Quick and straight cutting • possible up to Schedule 100.

Suitable for cutting steel, stainless steel and cast iron pipes.

Only 90 ° to 110 ° freedom of movement and max. 125 mm space around is required!

The strong guides ensure a straight cut.

Due to the closed 360 ° construction, all force is exerted on the tube, this works very well efficient.

No sparks are released by this method of cutting. This cutter is unique in its kind that cuts straight every time and is also capable of Sch. 100 to cut.

S= including cutting wheels for steel/ Stainless St.
 I= including cutting wheels for (nodulair) cast Iron.
 X= including cutting wheels for Sch. 80 steel.
 XX= including cutting wheels for Sch.100 steel.

Cutting wheels of the same cutter size are interchangeable. These wheels are made from impact resistant tool steel on CNC lathes and are then subjected to a precise hardening process. As a result, they cut easier and faster, the service life is longer.
